WHAT IS BOOST BALANSA?

Boost Balansa is an important annual pasture legume which can be relied upon to set seed annually to produce valuable kg's of pasture dry matter.

Boost is naturally hard Seeded and if allowed to set seed periodically will survive false breaks and be a strong source of forage and conserved fodder.

Boost will fix nitrogen into the soil and can be utilised in cover crop winter mixes for all soil types as long as rainfall is between 450 – 800mm annual rainfall.

TIPS FOR SUCCESS

- Sow @ 3 – 8kg/ha as sole species
- Sow 1 – 3kg/ha in a pasture mix
- Suits Soil PH from 4.5 – 8.5
- Inoculate with group C Inoculant

BENEFITS OF BOOST BALANSA

- Late season production
- Reliable regeneration
- Excellent seed and forage yields
- Strong Nitrogen fixation properties
- Suitable for all classes of livestock
