

Formulated with
TITAN GENETICS!

"All the benefits of our T.L.C. Tall Fescue Blend PLUS Kentucky Bluegrass!"

When your situation demands the recovery ability of Kentucky bluegrass and the durability and flexibility of tall fescue, choose T.L.C. Plus! Under most situations, this special formula will rely heavily on the excellent tall fescue components, including our Titan fescues. This formula will be able to access water and nutrients at a deep level and be able to take the pressures of sun, shade, and heat, while still looking great.

In addition, TLC Plus' Kentucky bluegrass component adds additional rhizome activity to provide a quicker recovery under athletic or other wear situations. Additionally, sod producers will appreciate increased tensile strength. **Learn more at www.TitanFescue.com.**

-  Traffic Tolerant
