

***Our Latest and Greatest Titan!***  
***Titan GLX is our newest release with even more disease resistance, plus darker color and eye-catching turf quality. Professionals and homeowners trust Titan!***

### Variety Summary

Titan GLX is our fifth-generation Titan release. For over 30 years, homeowners and professionals alike have come to trust Titan tall fescues for beautiful, durable turf, even in harsh and demanding conditions. Titan GLX continues that tradition with eye-catching turf quality, rich green color, thick density and exceptional disease resistance. Play hard with your children and pets. Plant as a single variety or a component for athletic fields or high traffic areas. Titan GLX is your new favorite tall fescue!

### Heat Tolerance/Summer Stress

Titan GLX provides confident performance, even in those regions susceptible to heat and humidity. Whether used for a show lawn or an active play area, Titan GLX offers excellent resistance to summer stress, providing an attractive lawn that will stay greener longer and recover quicker from stress and active use.

### Cutting it Close

Need close-cut turf? Titan GLX is able to withstand consistent cutting as low as 1.5"! While it is still recommended for most applications and locations to maintain a 3-4" higher cutting height, turf trials at Blacksburg, VA rated Titan GLX as one of the best for continuous close cutting.

### Sun and Shade Tolerance

While all grasses need sunlight, Titan GLX has shown very good adaptability to both sunny and shady areas.

### Brown Patch and Other Disease Resistance

Great turf doesn't just happen. Titan GLX looks beautiful in part due to improved disease resistance. Brown patch is one of the most destructive diseases in tall fescue. Titan GLX has been bred to both resist and recover from brown patch. This was verified at over ten locations in nine states during the national NTEP 2018-23 trials. Additionally, Titan GLX provides improved resistance to gray leaf spot, Typhula blight, Pythium blight, pink snow mold, and red thread.
