

Covenant II^{turf-type tall fescue}

Twice as good!

Covenant II is new elite turf-type tall fescue that will provide consistent, attractive turf for all types of tall fescue lawn applications. **Covenant II** has an attractive rich green color, high uniformity and good density result in overall high quality turfgrass. Bred to combat major diseases affecting tall fescue, **Covenant II** should provide years of healthy turfgrass, even in areas affected by disease pressure such as cool-temperature induced brown patch. The following performance data demonstrates why **Covenant II** should be part of your tall fescue program:

BROWN PATCH RESISTANCE

Brown patch is a major disease for tall fescue. **Covenant II** was bred to better resist brown patch, especially cool-temperature brown patch.

TURFGRASS DENSITY

Stand density affects overall lawn appearance, weed resistance, and plant health. **Covenant II** provides good density throughout the year.

GENETIC COLOR

You will like the rich green color of **Covenant II** tall fescue. Its genetic color is not too light, or too dark, but just right!
